📊 RETAIL SALES ANALYSIS DASHBOARD – PROJECT REPORT

---

1. Project Overview

This project focuses on analyzing retail sales data to understand business performance, customer behavior, and profitability.
The dashboard is built using **Power BI** and helps stakeholders make **data-driven decisions** by visualizing sales trends, customer patterns, and discount impacts.

The dashboard is divided into five main sections:

- Overview
- Sales Performance
- Customers
- Products
- Discount Analysis

Each section answers a specific business question.

---

2. Objective of the Dashboard

The main objectives are:

- To analyze **overall sales and profit performance**
- To identify **top-performing regions, products, and customers**
- To understand the **impact of discounts on profit**
- To detect **risk areas and improvement opportunities**
- To support **better business decision-making**

---

3. Overview Page – Business Summary

Key Metrics:

- **Total Sales:** 2.30M
- **Total Profit:** 286.40K
- **Profit Margin:** 12.47%
- **Total Orders:** 5009
- **Sales per Unit:** 60.92

Insights:

- The business maintains a **healthy profit margin**.
- Sales and profit move together, showing stable pricing strategies.
- The **West region** contributes the highest profit.
- The actual profit margin **exceeded the target by 15.85%**, indicating strong performance.

---

4. Sales Performance Analysis

Key Insights:

- The **Consumer segment** contributes the highest profit.
- Sales show **seasonal trends**, with higher performance toward the end of the year.
- The company achieved **97% of its sales target**, which reflects strong execution.
- **California** is the top-performing state.

This section helps understand *when* and *where* sales are strongest.

---

5. Customer Analysis

Key Insights:

- There are **793 unique customers**.
- Average delivery time is **3.96 days**, indicating efficient logistics.
- **High-value customers contribute more than 50% of total sales**.
- West and East regions have the highest customer concentration.

This shows that retaining high-value customers is crucial for revenue growth.

---

6. Product Performance Analysis

Key Insights:

- A small number of products generate most of the revenue (Pareto Principle – 80/20 rule).
- Technology products generate higher profit compared to other categories.

- Some products have high sales but low profit, indicating cost or pricing issues.
- Most products fall under **medium risk**, while loss-making products are minimal.

This helps identify which products to promote or optimize.

---

7. Discount Analysis

Key Insights:

- Medium discounts provide the best balance between sales and profit.
- High discounts reduce profitability significantly.
- Corporate customers respond better to discounts compared to other segments.
- Discount strategy directly impacts revenue and profit margins.

This helps in planning smarter promotional strategies.

---

8. Key Business Takeaways

- The business is **financially stable and profitable**.
- **West region and Consumer segment** drive maximum revenue.
- Strategic discounting can improve profit without hurting margins.
- Customer segmentation helps target high-value customers effectively.
- Data-driven decisions can further optimize growth.

---

9. Conclusion

This dashboard provides a **complete view of business performance**, enabling stakeholders to:

- Track KPIs easily
- Identify trends and risks
- Improve profitability and customer strategy
